Sample submission:

Samples must be submitted by a veterinarian and must be frozen until shipped. It is best to ship overnight on ice packs. UGA does not have weekend delivery so make sure we receive the package on Tuesday through Friday! Please include as much history and clinical information as possible.

- Whole blood (0.1 ml minimum): collect in EDTA tube and immediately FREEZE;**
- Feces/cloacal/choanal swab: collect and immediately FREEZE;**
- CNS Tissues: collect and immediately FREEZE.**

****We will accept serum but it will be archived for future validation of serological testing at no charge. Periodically refer to <www.idl-uga.com> for updates.**

Serum (0.1 ml minimum): separate from the clot, place in separate tube (very important!)*, and FREEZE; *PLEASE NOTE: Serum must be placed in a separate container (completely removed from the clot). *Unseparated specimens will be rejected!*****

The current diagnosis of psittacine proventricular dilatation disease (PDD) requires histologic examination of affected neural tissues. The pathogenesis and pathogenicity of avian bornaviruses, and their relationship to PDD, are unknown at this time.

PAYMENT and REPORTING: A bill will be sent at the end of the month for all tests received during that calendar month unless payment is received with sample. We cannot accept credit cards for payment. Checks should be made to the Infectious Diseases Laboratory. Results will be sent to a secure FAX machine if a FAX number is given or returned by first class mail. The receiver accepts responsibility for the security of the receiving FAX machine.
