

Memorandum

Date: February 5, 2004

To: Faculty, College of Veterinary Medicine

From: Harry W. Dickerson, B.V.Sc., Ph.D.
Associate Dean for Research and Graduate Affairs

Re: Statistical Consulting Service

As announced in a previous memorandum (November 14, 2004), the College now provides statistical consulting through the on-site services of Dr. Shyla Jagannatha. Consultations are scheduled twice a month and funded through the Dean's Office. Venues and times of consulting are provided bi-weekly through the College's "News" listserve. Appointments may be scheduled by contacting Ms. Teresa McClure at 2-5734 or tmccclure@vet.uga.edu.

In addition to consulting, the services of Dr. Jagannatha and Dr. Joe Hauptman (Michigan State University) are available for data analysis. The cost of data analysis is the responsibility of the investigator. **Please note that the College covers only the cost of consultation, and that investigators themselves must pay for subsequent statistical analyses.** If analyses are requested, a form is available from this office or directly from Dr. Jagannatha. The form, which has a place to list the grant project name and number to which the analysis will be charged, must be completed and signed before work is initiated. A copy of the form is attached.

Our goal is to provide a useful and prompt statistical service, at reasonable cost to the investigator.
